1. Construction work on the railroad section Stendal to Salzwedel of the railroad line from Berlin to Bremen was completed during the latter part of December 1951. This construction work included removing the heavy weight long rails from the entire stretch and replacing them with light weight rails of short sections. The heavy weight rails were then transported to the Berlin area. The light weight rails had been dismantled from several short private lines in the Stendal-Salzwedel area.
2. Railroad employees claim that this replacement of heavy rail by light weight rail will also be carried out on the Stendal-Cebisfelde line.
